### Projects

#### PokeDex (Javascript)

User can search through a Pokemon Collection, that is loading from an external API. Details can be displayed in a modal by clicking on a Pokemons name-built with JS, Bootstrap Framework, CSS and jQuery

#### myFlix-Client (React)

Single-Page-Application allows User to create an account, obtain information about movies & make a list of favourites.

Technologies used: Node.js, Express, MongoDB, Heroku for hosting, Postman for testing.

#### Chat App (React-Native)

It is a chat application for mobile devices built with React Native, Expo, Google Firestore Database authentication, Firebase Cloud Storage and Gifted ChatLibrary. The app provides users with a chat interface and options to share images, camera photos and their locations.
